Maria Letsiou

Stockholm, Sweden

+46 79 039 83 04 | letsioumaria1@gmail.com | maria-letsiou

Web developer with an MSc in Web and Mobile Application Development and a solid foundation from 7 years of building websites and web interfaces, now focused on growing into a full stack engineer. Build React front ends with JavaScript, HTML and CSS, and am familiar with TypeScript and Next.js. Comfortable working with HTTP, REST APIs and SQL data. Experienced in maintaining and extending existing codebases, including custom WordPress plugins in PHP and JavaScript, and in integrating third-party services such as Google Maps and Geocoding APIs. Strong interest in backend development, AI-powered features and security.

Experience

Web Designer / Web Developer

Stockholm, Remote

PHOENIX DIGITAL AGENCY

06/2024 - Present

- Delivered custom landing pages and interactive UI components with HTML, CSS and JavaScript.
- Developed and maintained e-commerce websites on WordPress and WooCommerce.
- Drove accessibility improvements across client sites by applying WCAG best practices.
- Developed custom WordPress plugins in PHP and JavaScript, including a tailored admin interface that lets a real estate client manage property listings independently.
- Set up and managed Google Tag Manager with conversion and lead-tracking tags to measure user behavior, including tracking a 30% rise in user engagement after redesigning a landing page.
- Applied technical SEO and GEO best practices to websites.
- Hands-on experience with React to build end-to-end web application
- Owned website proposals end-to-end, from Balsamiq wireframes to high-fidelity Figma mockups.
- Improved website performance, speed, and security by managing Cloudflare configuration for client websites, including cache settings, CDN setup, bot attack mitigation, and file management.
- Integrated Google Maps and Geocoding APIs and managed Google Cloud Platform projects (setup, billing, Cloud Storage) for client websites.
- Used Google Search Console to monitor search performance and resolve indexing and crawl issues.
- Familiar with BigQuery
- Familiar with TypeScript and Next.js
- Designed company brochures and digital marketing materials using Canva and Adobe Photoshop.
- Led solution architecture for client proposals, consulting with stakeholders to align technical solutions with business needs.

Web Designer / Developer

Larissa, Greece

ITBIZ

01/2019 - 05/2024

- Designed and developed responsive, cross-browser websites, e-commerce interfaces and landing pages with JavaScript, HTML and CSS.
- Created websites with CMS platforms such as Wordpress, Joomla and Opencart.
- Optimized client websites for search engines through on-page SEO, clean semantic HTML, page speed and mobile responsiveness.
- Wrote SQL queries to organize and maintain customer and product data feeding client-facing interfaces.
- Applied WCAG-compliant frontend practices to improve accessibility.
- Monitored interface performance and user behavior with Google Analytics and Google Tag Manager.
- Delivered work directly with clients across all project phases in an Agile, Scrum-based iterative workflow.
- Supervised and supported interns in their daily tasks.
